First Quarter Edition 2021

From the Beginning

It was in the beginning of 2021 where the whole world has been affected with the pandemic. The team went forward taking every Local Government laid Protocol into serious consideration to identify children and youth with disabilities. We met them and explained to them and their parents about the aims and vision of Marvelling Roots. They seem happy and relaxed that finally someone is offering a helping hand to include them and their children in the society. Identified 64 person with disabilities where they need intervention and enroll 15 children with disabilities in the center. It was not an easy task to be moving around during the pandemic where we might feel the non-acceptance attitude from the community, but, it was the opposite of what we anticipated and were ready for. We were not ready to be accepted but in the very best of their attitude they accepted us. We feel now that we are ready to move forward and taking them into the society to be included.

Cause Work

Home based intervention and exercises taught to parents of children with cerebral palsy, the basic posture exercises and gripping exercise which will ease the children while playing or sitting for food. Children with Intellectual Disability were taught the skills of communication and relaxation game to ease their thoughts and mind, daily living skills were being taught to them so that they can help their parents and guardian on their daily chores. Children with visual impairment were taught Braille and were put into inclusive school to learn the basic of Braille and

The sanctuary

Early intervention Center

An early intervention center has been set up in the heart of the Sohra town. We have enrolled 15 children with disabilities. During the pandemic we were not being able to conduct the intervention at the center but instead did a home visit taking the consent from their parents and also following the Government laid protocol. The Center we are proud to announce that we are opening again and shall conduct the intervention and rehabilitation in a better and improved ways. It was named as the MarvellingGreen Rehabilitation and Learning Sanctuary.

"Inclusion and Diversity"

Support us

None of this will not be possible without your love and support. We are thriving in making the society accessible for all. We promote inclusion and diversity and believes that everybody deserve equal opportunity and equal rights.

A walk to Rehabilitate

Nongsteng Village.

In the midst of the Pandemic the intervention took pace in a small village of Nongsteng a 4 hours walk from Sohra. An inclusive education and basic learning took place where the children would find joy and happiness. We would teach them, numbers, alphabets and the concept of money and weight. "It was the first of its kind that had ever took place in the village" as mentioned by the village elders. During the intervention there were no segregation amongst the disabled and the non-disabled, in the same room they were taught what we're being taught in school. Learning and teaching material were being distributed in the village, the learning and teaching kit would help them to understand the shape concept, movement and mobility therapy. We shall prepare those children to be ready for the future and to be part of the society.

Kanthari Foundation Switzerland

We have had the opportunity to be funded by the Kanthari Foundation Switzerland to implement the programs on early intervention, inclusive education and training on Livelihood for Person with and without disabilities. Being a part of such a big community is a great start for us and for the region where we will be working for. Fund raising events and activities shall be conducted in Sohra through their support to promote inclusion
